Ingage™
Employee feedback system

We're revolutionizing how multifamily manages employee feedback

Attracting and retaining high performing team members is one of the greatest challenges multifamily leaders face. Ingage by Swift Bunny™ is helping organizations drive superior performance—and a better bottom line.

- Our confidential surveys give team members a safe way to speak the truth
- Data has a shelf life. It's not sufficient to ask for feedback once a year. Our program solicits feedback based on key events in the employee lifecycle such as new hire onboarding, new supervisor transition, and position change—delivering leaders fresh, current, actionable input all the year through
- Our unique two-dimensional survey methodology asks not only for agreement with statements about the employee experience, but also each topic's importance. This enables leaders to quickly identify what matters most to employees
- Powered by the industry's experts in innovative feedback systems, Ingage™ lets you leverage our decades of experience in writing and administering effective multifamily surveys
- An intuitive dashboard and robust reporting make it easy to compare results across a portfolio and benchmark against industry peers
- Of course, feedback is only valuable if you do something with it. Built-in recommendations in our Action Item Library allow you to address opportunities and track improvements within the system

Baseline Audit

Company Profile Assessment

Completed by the client program administrator in preparation for launch of the Ingage™ initiative, the goal of this assessment is to evaluate policies and programs in place that relate to the employee experience. Results add context when evaluating employee survey findings and can help Swift Bunny experts provide consultative support.

Baseline Employee Engagement Survey

This comprehensive survey of all employees is the starting point for understanding and improving employee engagement. Obtaining a large cross-section of team members' opinions at program launch allows leadership to identify strengths and opportunities to improve employee satisfaction, loyalty, performance, and brand reputation. Positive and negative feedback both have tremendous value and help leaders to quickly identify what matters most to employees in order to make impactful improvements.
